The Small Specialist
Seating Range from CareFlex

Tailored Specialist Seating for the Smaller User

At CareFlex, we understand the unique challenges children and young adults face in balancing their seating needs with everyday activities. Our small specialist seating solutions are meticulously designed to address their individual requirements, providing comfort, support, and the opportunity to engage in daily life.

Our commitment to providing effective postural care in sitting extends to children of all ages and sizes. From toddlerhood to adulthood, our range of small specialist seating chairs is tailored to meet the unique needs of the smaller user. CareFlex chairs empower children and young adults to engage confidently and independently with thoughtful design features and customisable options, including colours and fabrics.

Tailored Design for Personalised Care:

- **Durable**: Our chairs are crafted with high-quality materials to ensure durability. We understand that children and young adults with specialist needs require equipment that can withstand the demands of everyday use. Our chairs are built to last, offering reliability and longevity.
- **Adaptability:** Flexibility is vital when catering to the diverse needs of young users in various conditions. Our chairs are designed to be easily set up and adjusted, allowing caregivers to customise the seating experience based on individual requirements. Whether for playtime, mealtime, or therapy sessions, our chairs can adapt to promote engagement in different activities.
- **Postural Support:** We prioritise each user's comfort and stability. Our chairs are ergonomically designed to provide optimal postural support, ensuring proper alignment and minimising the risk of discomfort or injury. With a tailored provision for every user, our chairs promote improved posture, protecting the body structure from destructive positioning and limiting postural deterioration.
- **Pressure Redistribution:** Children and young adults with specialist postural needs are often susceptible to pressure injuries and discomfort caused by prolonged sitting. Our innovative WaterCell Technology and advanced chair functions ensure optimal pressure redistribution. By reducing pressure points and promoting even weight distribution, our chairs help mitigate the risk of soft tissue damage, offering relief and comfort to young users.

HydroTilt® - Mini & Small

The Perfect Comfortable Occupational Chair for Children

Enjoy unparalleled comfort with the HydroTilt, designed for functional activities like watching TV, gaming, and spending time with loved ones. It promotes safety and security, includes a Tilt-in-Space feature, and integral pressure management to ensure a comfortable seating experience.

- **Adjustable Dimensions:** Customise the seat depth and width effortlessly to provide the optimal postural support. With easy adjustments, caregivers can safely support the individual user to sit securely within the chair.
- **Wide Range of Accessories:** Tailor the HydroTilt to suit individual needs with various accessories available. From headrests to lateral supports, the HydroTilt can be personalised to maximise comfort and functionality.
- **Unique Lower Limb Support:** The HydroTilt's padded footplate is angle-adjustable for ultimate comfort and support. Additionally, the leg rest features a 25° negative angle to facilitate standing, promoting independence and mobility.

With mini and small internal seat widths ranging from 280mm to 430mm, the HydroTilt is suitable for children and young adults of various sizes. Its durable construction ensures reliability and safety, with a maximum user weight of 75kg.

The HydroTilt offers the perfect blend of simplicity, security, dependability, robustness, and comfort. Ideal for children and young adults with specialist postural needs, it's the ultimate choice for ensuring a comfortable yet functional seating experience.

MultiAdjust® - Small

Adjustable, adaptable and grows with the individual user

Offering comfort and support, the MultiAdjust is not just a chair; it's a tailored seating solution designed to adapt to the unique needs of each user. Its tool-free adjustments provide unparalleled comfort without sacrificing postural support or pressure care.

- **Versatile Adjustability:** Experience the freedom of customisation with features like Tilt-in-Space, Back Angle Recline, and lower limb support. Whether manual or motorised control options, the MultiAdjust ensures effortless functionality to suit individual preferences.
- **Suitable for Every Environment:** From healthcare facilities to community settings, the MultiAdjust thrives in a variety of environments. Its modular design and interchangeable accessories make it an ideal choice for specialist educational settings, efficiently catering to various seating needs.
- **Peace of Mind:** Rest assured with the CareFlex Lifetime Frame Warranty, a testament to the robust construction quality and durability of the MultiAdjust. It is an investment in long-term comfort and support.
- **Perfect for All Ages:** Designed to accommodate users of all ages, the MultiAdjust is well-suited for children and young adults. It ensures an ideal fit for every user with options like mini and small internal seat widths ranging from 330mm to 480mm.
- **Built to Last:** With a maximum user weight of 100kg, the MultiAdjust seamlessly combines comfort and durability. Whether it's for daily use or occasional seating needs, trust in the reliability and longevity of the MultiAdjust.

Experience the difference with MultiAdjust – providing comfort, adaptability, and peace of mind.

HydroFlex® - Small

An adaptable rehabilitation chair

The HydroFlex is meticulously engineered to provide unparalleled flexibility, incorporating various innovative features to address complex postural and pressure management needs. Its unique design includes an articulating back, Back Angle Recline, Tilt-in-Space, articulating leg rest, angle adjustable footplate, and integral pressure management system.

- **Versatile Adjustability:** Offering a comprehensive range of adjustments, the HydroFlex can accommodate specific postural requirements or serve as an integral component of a rehabilitation program. With its wide array of accessories, the chair can be customised to meet the unique needs of each user, ensuring optimal comfort and support.
- **Ideal for Complex Needs:** Designed to meet the demands of individuals with complex posture and pressure management needs, the HydroFlex is particularly well-suited for children and young adults with conditions such as cerebral palsy, brain injuries, or spinal injuries and those undergoing intensive therapy. Its adaptability and versatility make it an invaluable tool in rehabilitation, facilitating comfort, activity, and therapeutic progress.
- **Advanced Pressure Management:** The HydroFlex integrates advanced pressure management features to ensure optimal care for users with movement difficulties or sensory impairments. By distributing pressure evenly and reducing the risk of pressure ulcers, the chair promotes skin health and overall well-being, even during prolonged periods of sitting.
- **Compact Size Options:** Available in a range of small internal seat widths of 280/330/380/430mm, the HydroFlex can accommodate users of various ages and body types. This ensures a comfortable and secure fit for each individual, optimising the effectiveness of the rehabilitation process.
- **Robust Construction:** With a maximum user weight capacity of 100kg, the HydroFlex is built to withstand the rigours of daily use in clinical and home environments. Its durable construction and reliable performance provide peace of mind to users and caregivers, ensuring long-lasting support and functionality.

The HydroFlex represents the pinnacle of adaptability and versatility in rehabilitation seating, empowering individuals with complex needs to achieve their full potential.

SmartSeatPro® II - Small

Maximum flexibility for children and young adults with complex needs

Introducing the SmartSeatPro II: revolutionising specialist seating as an effective solution for children and younger adults with complex needs and postural challenges.

- **Maximum Flexibility:** The SmartSeatPro II offers unparalleled flexibility and adaptability. Its modular design allows for customisable configurations to fully stabilise, accommodate, and, where possible, correct postural asymmetries from the feet to the head.
- **Innovative Design:** The SmartSeatPro II features a range of advanced functionalities, including a Tilt-in-Space, Back Angle Recline, and a multi-adjustable back and head system with new sections of modifiable filling. This unique design enables Health and Social Care Professionals to optimise posture, function, and comfort for individuals in various environments, including domestic settings, schools, residential homes, and hospitals.
- **User-Centric Features:** With labelled seat width guides, quick arm height adjustments, and a tilt inclinometer on the armrests, the SmartSeatPro II prioritises user comfort and convenience. The armrests are fully removable to facilitate side transfers and hoisting, enhancing accessibility for users with mobility challenges. Whether manual gas action control or battery-controlled motors are preferred, the chair's operation can be tailored to individual and caregiver needs and preferences.
- **Versatile Sizing Options:** Available in small internal seat widths ranging from 280mm to 440mm, the SmartSeatPro II accommodates users of diverse ages and body types. Its robust construction ensures stability and support, with a maximum user weight capacity of 100kg, providing reassurance to users and caregivers alike.
- **CareFlex Lifetime Frame Warranty:** With the CareFlex Lifetime Frame Warranty, users can enjoy extra peace of mind, knowing that a commitment to quality and durability backs their SmartSeatPro II. This warranty underscores our confidence in the chair's reliability and longevity, ensuring lasting comfort and support.

Experience the next level of specialist seating with the SmartSeatPro II. Discover how its innovative features and customisable design can transform the lives of individuals with complex postural and pressure management needs.

Thank you to the children at Vranch House for helping us launch our small chair range. Vranch House consists of a centre for treating over 2,000 outpatients, providing various therapies throughout Devon, and an independent Day School in Exeter for children with significant physical difficulties.
