Air Comfort Deluxe

Product Information

CareFlex

Air Comfort Deluxe

The Air Comfort Deluxe chair and day bed combines innovative design features with superior comfort and functionality, making it an ideal choice for individuals with specialised seating needs in most health and care environments. The patented Airgonomic Seating System offers exceptional pressure redistribution to promote skin health for those at increased risk of developing pressure injuries. For individuals with fixed deformities who cannot sit in standard seating, the Air Comfort Deluxe provides a unique solution, accommodating moderate to complex needs while maintaining comfort and safety.

Tilt-in-Space and Back Angle Recline provide customisable positioning, supporting pressure care and postural needs. Drop-down arms and swing-away wings promote safe and efficient transfers for both the user and caregiver. These features help implement key pressure injury prevention strategies, including optimal user contact with the support surface and regular repositioning.

Available in Small, Standard, and Maxi options, the Air Comfort Deluxe accommodates individuals of varying shapes and sizes.

FEATURES

- Integrated pressure care: Airgonomic Seating System in the back, seat, and leg sections promotes a balance of comfort and pressure redistribution.
- Tilt-in-Space and Back Angle Recline: Adjustable positioning supports individual needs and promotes effective repositioning.
- Head support: Removable headrest cushion offers personalised postural support for daily activities.
- Leg rest support and elevation: Encourages relaxation and postural stability through proprioceptive feedback.
- Adjustable swing-away wings and drop-down armrests: Facilitates safe moving and handling, especially lateral transfers, and sling fitting and removal, reducing positioning effort for caregivers.
- Robust castor system: Includes three locking castors and one directional locking castor for stability and manoeuvrability.
- Hygiene-friendly design: Wipe-clean materials comply with infection prevention and control protocols using non-alcohol-based solutions.
- Replaceable covers and components: Extends the product's longevity, making it a cost-effective choice for service providers.
- Accessories: including a footrest, lap belt, meal tray, and bolsters, are available to enhance the functionality of the seating system making it suitable for diverse health and care environments.
- Warranty: 3 years for the frame and foam and 1 year for air bags, struts, castors and fabric.

CLIENT GROUPS

- Neurological and neuromuscular conditions
- Dementia
- Increased risk of pressure injuries
- Fixed postural deformities, especially those preventing use of standard seating
- Postural hypotension
- Non-ambulant

ENVIRONMENTS

- Hospital settings
- Hospices and respite care
- Nursing and residential homes
- Homecare
