2 Year warranty on the frame

HYDROCARE®

The simple and supportive pressure management chair for older people and those in dementia care.

Product Information

CareFlex

THE HYDROCARE®

The HydroCare from CareFlex is a supportive and adaptable nursing chair that incorporates a wide range of features to optimise the seating experience of its occupants. The HydroCare has all the dynamic features you would expect from a CareFlex chair, like a large range of seat depth adjustment, back angle recline and seat angle adjustment.

The chair also features CareFlex's WaterCell Technology® in the seat as standard, addressing most pressure relief needs. CareFlex have specified as standard high quality, twin wheel castors to make the chair easy to push and a sliding footplate to support feet whilst portering. A range of covering materials is available, all of which are easy to clean to keep the chair free of contamination and looking good. From a living room to a nursing home day room, the HydroCare should be the first choice for ambulant clients who need high levels of comfort, support and security.
